

Tiny model suggestions:

Request: {'type': 'promoter', 'strength': 'high', 'specificity': 'senescent'} -> Suggested: P1 (p53-responsive promoter variant)

Request: {'type': 'switch', 'strength': 'med', 'specificity': 'broad'} -> Suggested: S2 (toggle switch)

Request: {'type': 'promoter', 'strength': 'low', 'specificity': 'tissue'} -> Suggested: P3 (weak tissue-specific promoter)

*IF Senescence Signal detected → THEN activate kill gene*
